### COMMON QUESTIONS

**BUILDING CODES** - Each municipality has their own building codes. Those codes will supersede any recommendations made in this catalog. Please refer building code questions to your local inspector since they will be responsible for the interpretation of the code.

**FINISHING** – Stanisci Design does not offer any finishing, and are sanded to 180 grit. Hoods can be drop-shipped into the kitchen dealer or cabinet manufacturer you have specified.

**PANELS** – When ordering a hood with a door – you can pick any of the Framing Bead choices with any of the Panel Raises. For example: a shaker style door would be #445 / Flat #1997. See FAQ Page for available profile choices.

**MOLDINGS** – Many hood designs are available with several different molding styles: #1 Classical, #2 Simple or #3 Basic. Molding is along the base of hood – not the top crown. Top crown is supplied in field.

**HOOD HEIGHT** – Stanisci hoods should be mounted a minimum of 30" above the cooking surface (or 66" from the floor) unless the range manufacturer specifies more distance is needed.

**CUSTOM SIZES** – Stanisci hoods are built-to-order based on your specifications. Each hood series is offered in a range of standard sizes, or you can select an in-between size (custom widths may require an additional fillers charge).

**PAINT GRADE** – When choosing Paint Grade – please review specifications on the FAQ page for Paint Grade Materials. This information page will detail hood body construction and use of Hybrid Doors for this species. Maple is a stain grade species and not intended for painted applications. Finish issues related to painting Maple are not warrantable.

**RENDERINGS** - Libraries are available for most rendering software. See 'Rendering Software Libraries' of our website to download latest 2020 library, and instructions for accessing AutoKitchen and ProKitchen libraries. For other rendering software, please reach out to us for information.

**MODIFICATIONS & ACCESSORIES** – Please review the Modifications & Accessories section to see available options such as various Removable Options, Wood Battens, Sorrento Spice Racks and Corbel offerings.

**VENTILATION OPTIONS** - We have standard liners, Stainless Mesh and Stainless Baffle liners from 300-1200 cfm. We can also custom design hoods around most customer supplied vents.

**LEAD TIMES** – Lead times range from 2 weeks for straight hoods, and 3 weeks for hoods with curve(s) and/or door panels. Lead times do not include shipping.

**SHIPPING/ FREIGHT**- Wood hoods ship LTL Freight in re-enforced crates, and any ventilation will be strapped to the top. Ventilation that ships separate from the wood hood is shipped Ground or LTL Freight. See ventilation specifications pages for specific details

**SALES** - Stanisci Design hoods are sold wholesale only exclusively to cabinetry professionals. Retail customers are welcome to reach out to us for questions, however we will not discuss pricing and order details.

**TSCA / CARB** - Our hoods are TSCA /CARB compliant and will come with all appropriate labels.

Stanisci Design uses only the finest materials. Range hoods often become the focal point of the kitchen. All solid wood components are hand selected for color. All Stanisci Design Products are TSCA (C.A.R.B) compliant. Hoods are sanded to 180 grit, ready to be finished.

## Paint Grade Materials

The specifications below will provide information and define our Paint Grade species offering. This material selection is made from the best products available in the market and will give you superior results when painting.

**Hybrid Hood** – Paint Grade will be constructed using for the body of the hood, 1/2" thick MDF or HDF with no veneer thus providing a smooth surface to paint. We are also utilizing a 3/4" thick plywood core with an 1/8" HDF (high density fiber) outer layer, commonly referred to as a Combi Core. Both materials present a smooth surface to finish and are considered the best materials on the market for painting. All molding and hardwood pieces will continue to be Paint Grade Hard Maple. All structural parts will continue to be 3/4" thick veneer core plywood.

**Superior Surface** for curved hoods – We use a bendable material exclusively designed for painting on all our curved hoods. This material is referred to as Superior Surface. It will be used on the curved section of the hood. This is a paintable man-made material which is impregnated with resin. This is a proprietary material which we have worked with our suppliers to develop for our curved hoods. It is very smooth, stable and has great adhesion.

**Hybrid Doors** – Doors will be constructed with a Paint Grade Hard Maple frame and MDF panels – raised or flat panels. Hybrid center panels have been tested extensively in the market and have proven to be effective in providing a more durable and superior product for painting. The machining on the hybrid MDF panel profiles is just as precise and clean cut as with solid wood panels. The Hybrid MDF panel provides a more stable product that does not expand and contract like a solid wood center panel. The elimination of center panel shrinking virtually eliminates raw material showing along the outside of a center panel as the seasons change. Eliminating expansion of the center panel also helps to reduce hairline cracks that may develop in the mortise and tenon joint of the door framing.

### Paint Grade:

Hood/Cabinet Sides: 3/4" thick Combi Core Plywood

Mitered Portions: 1/2" thick MDF/HDF

Curved Sections: Superior Surface

**Maple** is hard and heavy with good strength properties, in particular it's high resistance to abrasion and wear. The raw wood color ranges from near white to a dark reddish brown. The wood has a close fine texture and is generally straight grained. **Maple is stain grade Maple & not intended for Painted Applications.** Finish issues related to painting Maple are not warrantable. Please use Paint Grade for all painted applications.

**Alder** is extremely soft hardwood of medium density. Colors range from light brown with a yellow tinge to light brown with a reddish tinge. Alder is fairly straight grained with a uniform texture. This wood may have pin knots and mineral streaks. Mineral streaks and other natural variations help create the personality of this product.

**Rustic Alder** material will allow for varying size knots & other sound characteristics including mineral streaks. Both sapwood & heartwood can be present in varying amounts.

**Hickory** is a very hard, very heavy and dense hardwood which demonstrates extreme variations in color from nearly white to dark brown. Grain patterns can be bold and prominent with irregular characteristics that are associated with tree growth. Burls, water stains, mineral streaks and sound knots are typical and are not considered defects.

**Cherry** is considered a medium density wood with moderate weight and strength. The heartwood of cherry ranges from light to dark reddish brown while the sapwood may be near white. The heartwood darkens with age and light exposure, this change can be dramatic. Cherry has a fine and uniform grain pattern with a smooth texture. Acceptable characteristics include brown flecks, natural gum pockets, mineral streaks and pin knots.

**Walnut** is an exceptionally beautiful and stable hardwood whose traits are strongly defined throughout the history of woodworking. Grain patterns range from straight to varied; providing striking depth when finished in natural tones. This specie's coloration fluctuates from dark brown to a purplish black.

**Plain Sawn White Oak** is White Oak lumber is characterized by uneven cathedral grain that would be similar in appearance to Red Oak grain patterns. Plain Sawn White Oak however has a neutral light to medium brown color sometimes with an olive hue. Known for strength and durability.

**Quarter Sawn White Oak** is cut radially (90-degree angle from the growth rings) instead of with the grain and produces vertical and uniform grain lines that are straight, tight and run the length of the board, sometimes creating prominent ray flecks. Structural benefits include that it reduces twisting, warping and cupping, holds finishes better, and does not allow liquids to readily pass through it.

**Rift Sawn White Oak** is specifically cut White Oak lumber where logs are quartered, then sliced perpendicular to the growth rings of the tree. The resulting grain pattern is relatively straight, but the spacing between the grain will vary. This specie will have the normal color range of other White Oak variations, but the method of cutting eliminates cathedral grain, but allows limited amounts of mineral and pin knots to be present.

**Red Oak / Quarter Sawn Red Oak** is a hard, heavy wood which results in great wear resistance. Color ranges from white to light brown to a pinkish reddish brown. Red Oak will be plain sliced, Quarter Sawn Red Oak will be quarter sawn cut.

#### FRAMING BEAD

#### PANEL RAISE

*Framing Bead Shown: 445*

*Panel Raise Shown: Flat/ 1997*

#### **FREE – STANDING HOODS**

Free-standing range hoods are mounted to the wall above the cooking surface, and stand alone from any adjacent cabinetry. These hoods will not have flush sides, and typically have design elements or decorative accents that prohibit a cabinet from being installed flush against the sides.

FREE-STANDING MODELS: AX, B, BXHW, C, CX, D, E, E200, ER200, ER600, FX200, G, GT, K200,

#### **IN-SERIES HOODS**

In-Series hoods are mounted to the wall above the cooking surface, and have completely flush sides. Moldings and decorative accents will not extend past the sides. This allows cabinetry to be installed on either side of the range hood to achieve a continuous design, but can also be used in a stand-alone design. .

IN-SERIES MODELS: A, BX, E300, ER300, ER400, ER500, FX300, J, K300, L2, M, N, P, Q, S, SB100, W, XRA, Z200

*H Series shown with RA Base (HRA)  
#1 Classic molding, and optional corbels  
(48" – 60" wide will have 2 center panels)*

*H Series shown with Standard Base (H)  
#1 Classic molding, and optional corbels  
(66" – 78" wide will have 3 center panels)*

## H Series

Standard Widths	48, 54, 60, 66, 72, 78 (Reduced widths available) To calculate minimum width, take range width plus 18". Example: A 36" range would get a 54" wide hood. (36 + 18 = 54)
Standard Heights	38, 44, 50, 56, 62 (Reduced heights available) To calculate height, take ceiling height minus 52". Example: A 96" ceiling would have a 44" tall hood. (96 - 52 = 44)
Removable Options	Removable Panel is standard (MRP) 2" fixed top rail available by request (MRP-2TR) – see modifications section.
Ventilation	Hood must be a minimum of 18" wider than available vent width. Example: To use a 36" vent model, the hood should be a minimum of 54" wide
Available Moldings	#1 Classic, #2 Simple, #3 Basic
Available Options	Corbels - All Stanisci corbel options will fit this design (See corbel options page)
Grain Direction	Vertical (Base is horizontal)

Standard Heights: 38, 44, 50, 56, 62

## W Series

Standard Widths	66, 72, 78, 84, 90 (Reduced widths available) To calculate minimum width, take range width plus 36". Example: A 36" range would get a 72" wide hood. (36 + 36 = 72) (Assumes 9" clearance between cook top and leg on both sides. Refer to your local building codes for minimum required clearance.)
Standard Heights	54, 60, 66, 72, 78, 84 (Reduced heights available) To calculate height, take ceiling height minus 36". Example: A 96" ceiling would have a 60" tall hood. (96 - 36 = 60)
Removable Options	Removable Panel is standard (MRP) 2" fixed top rail available by request (MRP-2TR) – see modifications section.
Ventilation	Hood must be a minimum of 18" wider than available vent width. Example: To use a 54" vent model, the hood should be a minimum of 72" wide
Available Moldings	#1 Classic #2 Simple #3 Basic
Available Options	Pull out spice racks are standard – can be removed by request. Corbels - All Stanisci corbel options will fit this design (See corbel options page) Legs are set up for corbels, but full-size door can be requested if corbels are not being used.
Grain Direction	Vertical (Base is horizontal)

C Series shown with Gold Stainless Base (CGS)

BX Series shown with Stainless Steel Base (BXSS)

Underside view – Baffle filters will always be stainless steel regardless of selected finish

## Stainless Base w/ Baffle Filters

Metal Baffle Bases can be ordered in place of the 6" high Hardwood Base on many of our range hood designs, and also serve as the hoods ventilation system. These Metal Baffle Bases consist of a 6" metal bottom and a fully integrated baffle liner on the underside complete with LED lights, stainless steel baffle filters, and control knobs.

### *SS Base w/ Baffle Filters*

#### *Technical Features:*

- 6" high metal base available in 17 finishes
- Fully integrated baffle liner on the underside of metal base
- Dimmer controlled LED lighting
- Variable speed fan control
- Large dishwasher safe brushed stainless steel baffle filters
- Several blower combinations available
- Liner sizes available from 30" – 60"

Stanisci Design ventilation has been engineered specifically for Stanisci Design Range Hoods, and are in-stock and ready to ship!

#### Features your customers want:

- Dishwasher safe filters
- Easy cleaning
- Dimmer controlled LED lighting
- European design
- Three year in home warranty
- Quiet, variable speed blower- made in Germany

- Large dishwasher safe stainless steel mesh insert filters
  - Several blower combinations available
- Liner sizes available from 30" – 60"
- Made exclusively for Stanisci Design by Modern-Aire Ventilation

Stanisci Design ventilation has been engineered specifically for Stanisci Design Range Hoods, and are in-stock and ready to ship!

### Features your customers want:

- Dishwasher safe filters
- Dimmer controlled LED lighting
- European design
- Three year in home warranty
- Quiet, variable speed blower- made in Germany
- Charcoal filters available for re-circulating applications (air must be directed out of hood to maintain warranties).

### *Imperial Premium Liners*

- Dimmer controlled LED lighting
- Variable speed fan control
- Stainless Steel design w/ large, easy to clean aluminum mesh filters
- Large capture area
- 2 Internal motor combinations
- Sizes to fit 36" through 48" decorative range hoods
- Temperature-controlled auto-on feature

Stanisci Design ventilation has been engineered specifically for Stanisci Design Range Hoods, and are in-stock and ready to ship!

#### Features your customers want:

- Easy to clean filters
- Quiet, variable speed, single or dual blowers
- Dimmer controlled 5 Watt LED lighting, comparable to 50 Watt Halogen
- Temperature-controlled auto-on feature
- Three year in home warranty.

NOT APPROVED FOR  
USE IN CANADA

635 IPL-635-XX	635 CFM motor
DUCTING	7" ROUND (4.25" off center)
AMPS	110V - 15 amp dedicated circuit

**ISL-360 and IPL-635 DUCT: 7" round**

**IPL-990 DUCT: 10" round (must use 7" to 10" transition piece)**

\*Please note some cooktops require the range hood to be mounted higher than 30", see manufacturers specifications

**Ventilation fundamentals:****Length and width**

No range hood on the market is completely effective unless it covers the heat source completely. Wall mounted hoods should extend at least to the front of the cooktop and on a standard cooktop, cover the entire cooktop from left to right. When using a residential commercial cooktop, the hood should overextend the cooktop a minimum of 3" on both the left and right side if possible.

**Height**

The bottom of the hood should be 30" from the cooking surface. It generally provides the most effective and attractive-looking installation. Some cooking appliance manufacturers require wood range hoods to be mounted higher. Please install according to the cooking appliance manufacturers recommendation.

In situations where ducting has several elbows or runs long distances, it is recommended to step up to the next larger blower size.

**Internal Motors**

Internal blowers are mounted inside the wood hood above the metal liner. They push the air through the duct.

Note: Externally mounted blowers are mounted outside the home typically on the roof or an exterior wall. We do not sell externally mounted blowers

**System Noise**

Noise is created in ventilation by air movement. Disrupting air flow with ducting turns increase noise. To minimize noise, run the ducting as straight as possible. The swirling of air within the blower unit also creates noise.

**Back draft prevention:**

Stanisci Design liners do not contain back draft dampers. If the cold or hot air has made its way to the range hood the kitchen will be affected. We recommend wall or roof caps with spring loaded dampers. We do not stock these, however they are readily available in the market.

#### REMOVABLE TOP (RT)

Base of the hood will be installed first with the ventilation. After all hook ups are complete – the chimney top will be attached. You will need a minimum of 3/4" clearance to lower chimney on guides. Cutting or trimming of parts in field will void warranty and compromise structural integrity.

AVAILABLE ON THESE MODELS: BXHW, BXVHW, C, CX, E, E200, FX200, G, GT

#### REMOVABLE FRONT (RF)

Entire front section lifts straight up 3/4" and removes. Vent is easily installed, then front section is reattached. The rear cabinet box will be 16" deep (14" for J- Series). There is a 5/16" reveal on the front frame to box (adds 5/8" to overall width of front section only). A minimum 3/4" vertical clearance is needed between hood top and ceiling so that you can slide onto guides. Cutting or trimming of parts in field will void warranty and compromise structural integrity.

AVAILABLE ON THESE MODELS: J, P, Z200

#### MODIFIED REMOVABLE PANEL (MRP)

Door panel is removable, and attaches with clips. Panel extends the full height of hood, and the lower seam is hidden behind a shelf. Crown can be laid on top of door once vent hook-ups are made.

##### STANDARD MRP

no fixed top rail, panel extends full height of hood.

STANDARD ON THESE MODELS: H, H2, M, N, Q, SB100, W

##### AVAILABLE BY CUSTOM REQUEST

2" fixed top, 4" total top rail.

##### ORDER: MRP-2TR

#### APPLIED REMOVABLE PANEL (ARP)

An access panel is cut into the face of the hood, and decorative molding is applied to cover the seam.

Basic batten style molding is standard.  
ARP

Decorative molding style available by request.  
ARP-D

AVAILABLE ON THESE MODELS: C, CX, G, GT, I, J, P

#### STANDARD REMOVABLE DOOR PANEL

A door panel is applied onto the face of the hood, and is removable.

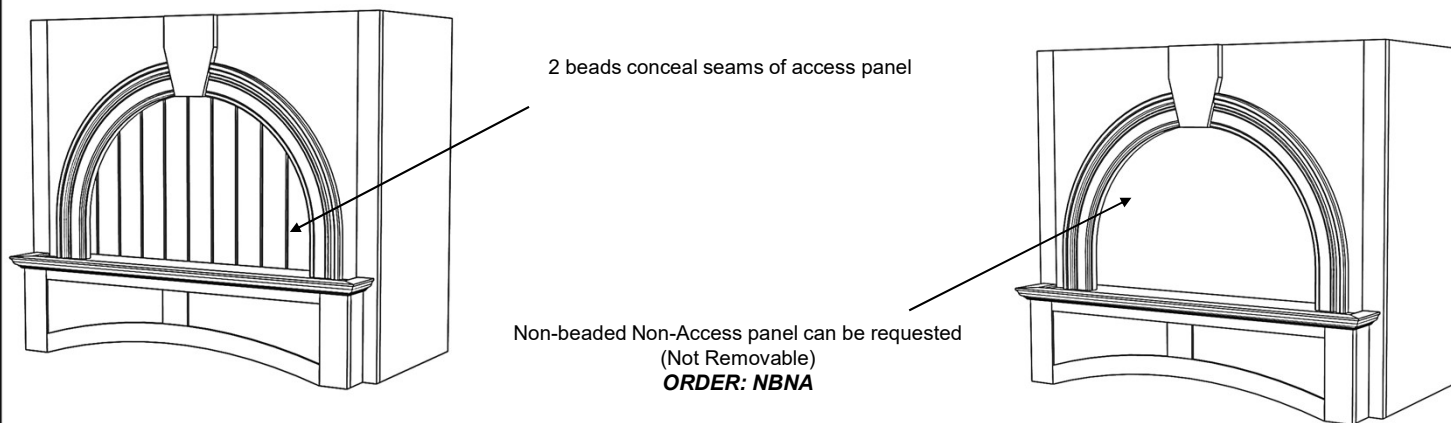

**STANDARD ON THESE MODELS: FX300, L2, S\***

*On all S-Series models, door removes by pulling upwards. Minimum 1/2" clearance is needed above top of door.*

#### BEADED ACCESS - CONCEALED

Decorative beading conceals 2 seams for the removable panel, secured by clips.

**STANDARD ON THESE MODELS: A, L**

#### ***CURVED BATTENS***

Curved Hardwood Battens are available in all of our standard species.

##### **AVAILABLE ON E-SERIES**

36" wide: 2 on face  
42" and 48" wide: 3 on face  
54" and 60" wide: 4 on face  
\* side battens available by request

##### **AVAILABLE ON E200, E300, ER200, ER300, ER400, ER500, ER600**

30" – 48" wide: 4 battens on face  
54" and 60" wide: 5 battens on face

#### ***Straight Battens***

Vertical Hardwood Battens are available in all of our standard species.

##### **AVAILABLE ON THESE MODELS: FX200, FX300, P**

#### ***Applied Hardwood Wrap***

A 6" high hardwood wrap can be applied along the bottom of an In-Series hood to create the visual appearance of a separate base section. The wrap is shipped loose, and can be trimmed in-field to desired depth so sides remain flush for cabinet installation. This wrap can be applied in a different species than the hood to create a two-tone design.

**\*\*Please consider door swings and clearances. Your cabinet design may require fillers or extended stiles\*\***

*Hardwood wrap will ship loose, and cut to full depth of hood. Can be trimmed in field to your desired depth.*

**AVAILABLE ON THESE MODELS: BX, BXV, E300, FX300, L2**

#### ***Applied Molding Wrap***

Basic style moldings can be applied along the top and bottom trim of the base panel and sides of In-Series hoods to create the visual appearance of a separate base section. Moldings are shipped loose, and can be trimmed in-field to desired depth so sides remain flush for cabinet installation.

**\*\*Please consider door swings and clearances. Your cabinet design may require fillers or extended stiles\*\***

*Molding wrap will ship loose, and cut to full depth of hood. Can be trimmed in field to your desired depth.*

**AVAILABLE ON THESE MODELS: BX, BXV, E300, FX300, L2**
