Stanisci Design Hoods

Mozaik product library - folder structure

4,261 Stanisci Design range hoods in **37** series folders (1,178 folders in all). Current as of October 28, 2026.
Library created by Jason Balm with Waukee CabinetWorks and CabLogic+, from the original DXF files provided by Stanisci Design. The hood designs are Stanisci Design's and are copyrighted by them.

Each series folder is shown with its first level of subfolders and the number of hoods in each. Inside these, Mozaik splits the hoods further by style and width, so no folder holds more than 12 products. One branch is shown opened all the way at the end.
