Metal base options are 6" tall and available in the G, T, B, D, E, C BX and Z300 hoods. This option includes a Stainless Steel BAFFLE liner, a Gold Stainless Baffle option and a clear coated brushed Naval brass option. You can specify one of eight different ventilators to go with this baffle liner. Liner is a stainless steel, gold stainless steel or clear coated naval brass base with baffle filters. The filters are ALWAYS stainless steel and are dishwasher safe. Liner includes halogen or LED light bulbs. Please note that when the hood is shipped, the base will be boxed separately. Bases will then be attached to finished hood when hood is being installed.

SS- Stainless Steel baffle base. In stock

GS- Gold Stainless Steel baffle base – these units have a 6 week lead time and will be drop shipped from Modern-Aire. These units have a gold power coat over a stainless base. FILTERS are stainless

BB- Brushed Naval Brass with a clear coat to protect brass finish. These units have a 8 week lead time and will be drop shipped from Modern-Aire. Filters are stainless.

Detailed specifications can be found under the product section which you are adding the base. For example if you want a G with a Stainless base option, see the G section of the catalog.

Please note all bases sent to California will have LED lights.

See ventilation section for available / ventilators.

**Finish samples can be requested at time of order.
SS – STAINLESS STEEL Series
GS- GOLD STAINLESS STEEL – 6 Week lead time (powder coated stainless with stainless filters)
BB – BRUSHED NAVAL Brass - 8 week lead time (clear coated brass with stainless baffle filters)
Professional Mesh Liners

Technical Features:

• Dimmer controlled halogen or LED lighting
• Variable speed fan control
• Large dishwasher safe perforated stainless steel mesh insert filters
• Internal and external blowers
• Seven blower combinations available
• Sizes to fit 30” through 60” decorative range hoods
• 22 gauge Stainless
• Made exclusively for Stanisci Design by Modern-Aire Ventilation

Stanisci Design liners are IN STOCK for immediate shipment. Ventilators designed to specifically fit Stanisci Design wood range hoods or custom hoods of your design.

Features your customers want:

• Dishwasher safe filters
• Easy cleaning
• Dimmer controlled halogen or LED lighting
• European design
• Two year in home warranty
• Quiet, variable speed blower- made in Germany

• NEW - Reducer option allows for 600 CFM units to be reduced to 300 CFM
**Please check your local building code before placing an order. Range Hoods and Liner ventilators are subject to local building codes. It is your responsibility to ensure Stanisci Design Wood Range Hoods and liner/ventilators meet your local building code and/or the appliance manufacturers specifications.**

† - Certain hoods need to have their base height increased to accommodate the taller baffle liner:

Increase by 1” on G
Increase by 1” on G, T, I, E, W, H, H2, S, J or A – if base is RA, DP2
Increase by 2” on G, T, I, E, W, H, H2, S, J, CSL or A – if base is DP1
Increase by 2.75 on all CPL, P’s, Z200, Z300, FX, L2 and Hardwood (HW) base option hoods
Increase by 1” on B, N and D – if base is DP1

This is a n/c adjustment which will be made automatically if hood and liner are ordered together.
Value Liners

Technical Features:

• Dual 40 watt lights (LED available)
• Multi-speed control
• Dishwasher safe filter
• 390 CFM blower
• 30" and 36" sizes available
• 6" round duct with built in backdraft damper
• Silver metallic powder coat finish

Value liners are IN STOCK for immediate shipment. Liners are designed to specifically fit Stanisci Design wood range hoods or custom hoods of your design.

Features your customers want:

• Dishwasher safe filter
• Easy cleaning
• Silver Metallic finish
• Stainless look
• Two year in home warranty
• Quiet, multi speed blower
• (All blowers sent to California must order LED bulbs)
Please check your local building code before placing an order. Range Hoods and Liner ventilators are subject to local building codes. It is your responsibility to ensure Stanisci Design Wood Range Hoods and liner/ventilators meet your local building code and/or the appliance manufacturer specifications.

Duct height 81-5/8", 6" round*

30" or height recommended by range/cooktop manufacturer

*PLEASE NOTE: If your range hood has an arch
Increase the vent height by the following:
- RA or DP2 base G,T,D,S,A,W,O,H,L,E,N any size increase by 2-1/2"
- DP1 base G,T,D,S,A,W,O,H,L,E,N any size increase by 3-1/2"
- M 30-36" wide increase by 4", M 42-60" wide increase by 6"
- Q-series increase by 5"

*30" will not fit Value liner with removable option (RT)
**Technical Features:**

- Dimmer controlled halogen or LED lighting
- Variable speed fan control
- Large filters with charcoal inserts
- Internal 600 cfm blower
- Sizes to fit 30” through 60” decorative range hoods
- 22 gauge Stainless
- Made exclusively for Stanisci Design by Modern-Aire Ventilation

Ventilators designed to specifically fit Stanisci Design wood range hoods or custom hoods of your design.

**Features your customers want:**

- Dimmer controlled halogen lighting
- European design
- Two year in home warranty
- Quiet, variable speed blower

**No ducting or vent cover included. Please note that these filters are NOT dishwasher safe and must be replaced periodically. Please note that all moisture will need to be vented outside of the hood to maintain all warranties.**
**Please check your local building code before placing an order. Range Hoods and Liner ventilators are subject to local building codes. It is your responsibility to ensure Stanisci Design Wood Range Hoods and liner/ventilators meet your local building code and/or the appliance manufacturer specifications.**

Duct height at housing in hood 3” off the wall (SS base – 2-3/16)

*Diagram depicts Professional Mesh Liner, increase installed duct heights on the Professional Baffle Liner by 2-3/4”*

Please note some cooktops require the range hood to be mounted higher than 30”, see manufacturers specifications.

700 South Glaspie Street • Oxford, MI 48371 • (248) 572-6880 • email: sales@wood-hood.com • www.wood-hood.com
**Ventilation fundamentals:**

**Length and width**
No range hood on the market is completely effective unless it covers the heat source completely. Wall mounted hoods should extend at least to the front of the cooktop and on a standard cooktop, cover the entire cooktop from left to right. When using a residential commercial cooktop, the hood should overextend the cooktop a minimum of 3” on both the left and right side if possible.

**Height**
The bottom of the hood should be 30” from the cooking surface. It generally provides the most effective and attractive-looking installation. Some cooking appliance manufacturers require wood range hoods to be mounted higher. Please install according to the cooking appliance manufacturers recommendation.

In situations where ducting has several elbows or runs long distances, it is recommended to step up to the next larger blower size.

**Internal vs. Remote/Inline**
Internal blowers are mounted inside the wood hood. They push the air through the duct. External or inline blowers are mounted on the roof, outside wall or in the attic (inline). External blowers pull air through the duct and offer superior performance to internal blowers.

Note: Externally mounted blowers are always recommended over residential commercial ranges; they are far superior in performance to internal mounted motors.

**System Noise**
Noise is created in ventilation by air movement. Disrupting air flow with ducting turns increase noise. To minimize noise, run the ducting as straight as possible. The swirling of air within the blower unit also creates noise. Using a remote blower places that air movement noise out of the kitchen and thereby reduces overall noise at the cook top.

**Back draft prevention:**
Stanisci Design liners do not contain back draft dampers. If the cold or hot air has made its way to the range hood the kitchen will be effected. We recommend wall or roof caps with spring loaded dampers.
